## Connecting Liquid Notes to your DAW

Last Updated: Sep 06, 2018 11:34AM CEST

---

This article provides information about how to connect Liquid Notes to your DAW or notation software. Tutorial videos are provided for your convenience.

### Routing to a DAW or notation software

Liquid Notes comes with a routing setup wizard that takes away the hassle of manual routing for most sequencers. At opening a MIDI file the setup wizard will prompt you to select a DAW from a list: if your DAW is not part of that list, select 'Other' to establish the routing manually or 'Built-in synth' to use Liquid Notes in standalone.

### Connecting to your DAW on Mac
