What can I do with LN Live?

Last Updated: Jun 01, 2014 01:58PM CEST

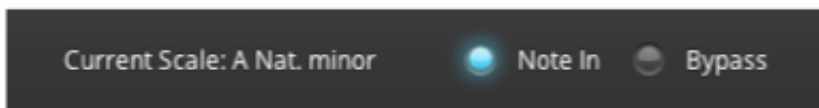

This article talks about the *LN Live* feature in Liquid Notes.

Quick Answer: LN Live is a feature that allows you to improvise error-free to a melody via a QWERTY computer keyboard or a MIDI input device (e.g. keyboard).

LN Live

Liquid Notes is equipped with a feature for improvising and creating melodies, called *LN Live*. With it, you can improvise error-free - i.e. only correct notes will be played - via a QWERTY computer keyboard or a MIDI input device (e.g. keyboard).

Any note played will illuminate the *Note In* indicator at the bottom right of the Liquid Notes window *:

LN Live will automatically select the correct scale for chord regions while a song is playing, and map wrong notes you play to the right notes in accordance with the *Input Scale* settings you selected.

You can select the *Input Scale* under *Settings > LN Live > Input Scale > Keynote*.

*: If a MIDI input device is connected, you can check it's connection status via the *Note In* indicator. Also, the *Current Scale* of your arrangement for the respective cursor/playback position and *Bypass* is shown there.
